Recent Advancements in Graph Theory

Mathematical Engineering, Manufacturing, and Management Sciences

Series Editor: Mangey Ram, Professor, Assistant Dean (International Affairs), Department of Mathematics, Graphic Era University, Dehradun, India

The aim of this new book series is to publish the research studies and articles that bring up the latest development and research applied to mathematics and its applications in the manufacturing and management sciences areas. Mathematical tool and techniques are the strength of engineering sciences. They form the common foundation of all novel disciplines as engineering evolves and develops. The series will include a comprehensive range of applied mathematics and its application in engineering areas such as optimization techniques, mathematical modelling and simulation, stochastic processes and systems engineering, safety-critical system performance, system safety, system security, high assurance software architecture and design, mathematical modelling in environmental safety sciences, finite element methods, differential equations, reliability engineering, etc.

Sustainable Procurement in Supply Chain Operations
Edited by Sachin Mangla, Sunil Luthra, Suresh Jakar, Anil Kumar, and Nirpendra Rana

Mathematics Applied to Engineering and Management
Edited by Mangey Ram and S.B. Singh

Mathematics in Engineering Sciences
Novel Theories, Technologies, and Applications
Edited by Mangey Ram

Advances in Management Research
Innovation and Technology
Edited by Avinash K. Shrivastava, Sudhir Rana, Amiya Kumar Mohapatra, Mangey Ram

Market Assessment with OR Applications
Adarsh Anand, Deepti Aggrawal, Mohini Agarwal

Recent Advances in Mathematics for Engineering
Edited by Mangey Ram

Probability, Statistics, and Stochastic Processes for Engineers and Scientists
Aliakbar Montazer Haghighi and Indika Rathnathungalage Wickramasinghe

Total Quality Management (TQM)
Principles, Methods, and Applications
Sunil Luthra, Dixit Garg, Ashish Aggarwal, and Sachin K. Mangla

Recent Advancements in Graph Theory
Edited by N. P. Shrimali and Nita H. Shah

Mathematical Modeling and Computation of Real-Time Problems: An Interdisciplinary Approach
Edited by Rakhee Kulshrestha, Chandra Shekhar, Madhu Jain, & Srinivas R. Chakravarthy

Preface xiii

Biography of Editors xv

Contributors xvii

Chapter 1 Graceful Labeling for Eight Sprocket Graph 1

V. J. Kaneria and J. C. Kanani
1.1 Introduction 1
1.2 Main Results 2
1.3 Concluding Remark 8

Chapter 2 Universal Absolute Mean Graceful Graphs 9

Hiren P. Chudasama and Divya K. Jadeja
2.1 Essential Preface 9
2.2 α-absolute Mean Graceful Graphs Consisting of the Property of Universality 10
2.2.1 Extreme Vertices in α-absolute Mean Graceful Graph 10
2.2.2 Universality in the Path Graph 11
2.2.3 Universality in the Star Graph 12
2.2.4 Universality in the Coconut Tree Graph 13
2.2.5 Special Graph Consisting of Universality in Absolute Mean Graceful Labeling 17

Chapter 3 Universal α-graceful Gear related Graphs 19

Divya K. Jadeja and V. J. Kaneria
3.1 Introduction 19
3.2 Universal α-graceful Gear related Graphs 21

Chapter 4 $L(2,1)$ - Labeling on Jahangir Graph 25

U. M. Prajapati and N. B. Patel
4.1 Introduction 25
4.2 Definitions 26
4.3 Labeling Number of Generalized Jahangir Graph 27
4.4 Conclusion 32

Chapter 5 V_4-Cordial Labeling of Some Ladder and Book related Graphs 35

Neha B. Rathod and Kailas K. Kanani
5.1 Introduction 35
5.2 Basic Definitions 36
5.3 Existing Results 37
5.4 Main Results 37
5.5 Concluding Remarks 45

Chapter 6 SD-Prime Cordial Labeling of Double k-Polygonal Snake Graph 47

U. M. Prajapati and A. V. Vantiya
6.1 Introduction 47
6.2 Main Results 50
6.3 Conclusions 54

Chapter 7 Edge Product Cordial and Total Edge Product Cordial Labeling of Some Wheel related Graphs 57

Chirag M. Barasara
7.1 Introduction 57
7.2 Edge Product Cordial Labeling 58
7.3 Total Edge Product Cordial Labeling 60
7.4 Results related to Shadow Graph of Wheel 61
7.5 Results related to Splitting Graph of Wheel 62
7.6 Results related to Middle Graph of Wheel 63
7.7 Results related to Total Graph of Wheel 67
7.8 Concluding Remarks 71
7.9 Open Problems 71

Chapter 8 Product Cordial Labeling for the Line Graph of Bistar 75

M I Bosmia and Kailas K. Kanani
8.1 Introduction 75
8.2 Main Results 78
8.3 Concluding Remark 82

Chapter 9 Sum Divisor Cordial Labeling for Vertex Switching of Cycle related Graphs 83

D. G. Adalja and G. V. Ghodasara
9.1 Introduction 83
9.2 Sum Divisor Cordial Labeling for Vertex Switching of Cycle related Graphs 84
9.3 Concluding Remarks 97

Chapter 10 A Few Results on Fibonacci Cordial Labeling 99

U. M. Prajapati and K. K. Raval
10.1 Introduction 99
10.1.1 Definition 99
10.2 Main Results 100
10.3 Conclusion 112

Chapter 11 Some More Parity Combination Cordial Graphs 115

U. M. Prajapati and K. P. Shah
11.1 Introduction 115
11.2 Notations and Definitions 116
11.3 Main Results 117
11.4 Conclusion 131

Chapter 12 Total Neighborhood Prime Labeling of Join Graphs 133

N P Shrimali and A K Rathod
12.1 Introduction and Definitions 133
12.2 Main Results 134

Chapter 13 Gaussian Vertex Prime Labeling of Some Graphs Obtained from Origami Models 147

N P Shrimali and S K Singh
13.1 Introduction 147
13.1.1 Spiral Ordering of the Gaussian Integers 148
13.1.2 Origami Models 149
13.2 Main Results 151
13.3 Concluding Remark 161

Chapter 14 Vertex Magic Total Labeling of Tensor Product of Cycles 163

N P Shrimali and S T Trivedi
14.1 Introduction 163
14.2 Calculation of Magic Constant 164
14.3 The Product $C_N \otimes C_n$ Possesses n Different Cycles of Length n 164
14.4 Known Results and Methods 166

Chapter 15 Antimagic Labeling of Some Star and Bistar related Graphs 173

Tarunkumar Chhaya and Kailas K. Kanani
15.1 Introduction 173
15.2 Magic Labeling 174

15.3 Antimagic Labeling 174
15.4 Some Known Results of Antimagic Labeling 175
15.5 Our Investigations 176
15.6 Conclusion and Scope for Further Research 180

Chapter 16 Distance Magic and Distance Antimagic Labeling of Some Product Graphs 181

N P Shrimali and Y M Parmar
16.1 Introduction 181
16.2 Cartesian Product of C_3^t and C_4 183
16.3 Direct Product of C_3^t and C_4 185
16.4 Strong Product of C_3^t and C_4 188
16.5 Corona Product of C_4 and C_3^t 189
16.6 Concluding Remark 191

Chapter 17 Graphs from Subgraphs 193

Joseph Varghese Kureethara and Johan Kok
17.1 Unary Operations on Graphs 194
17.2 Binary Operations on Subgraphs 194
17.3 Graphs from Subgraphs 195
17.3.1 Graphs from Type 1 Adjacency 195
17.3.2 Graphs from Type 2 Adjacency 196
17.3.3 Graphs from Type 4 Adjacency 197
17.3.4 Graphs from Type 6 Adjacency 197
17.3.5 Subgraphs of the Line Graph 198
17.4 Variations in the Adjacency Definition 198
17.4.1 Union Adjacency 198
17.4.2 Chord Crossing Adjacency 198
17.4.3 Incidence Adjacency 199
17.4.4 Counting based Adjacency 199
17.4.5 Distance based Adjacency 199
17.5 Transformation Graphs 199
17.6 Iteration, Convergence and Completion 201
17.7 Research Problems 202

Chapter 18 Unit Graphs having their Domination Number half their Order 207

Amit Kumar, Pranjali, Mukti Acharya, and Pooja Sharma
18.1 Unit Graph 208
18.1.1 Rings R for which $\gamma(G(R)) = \frac{|R|}{2}$ 210
18.1.2 Rings R for which $\gamma(G(R)) = \frac{|R|-1}{2}$ 215
18.2 Domination Number of Line Graph of Unit Graph ... 215
18.2.1 Line Graph of Unit Graph 216

Chapter 19 The Pendant Number of Some Graph Products 221

Jomon K Sebastian, Sudev Naduvath, and Joseph Varghese Kureethara
19.1 Pendant Number of Cartesian Product of Graphs 222
19.2 Pendant Number of Direct Product of Graphs 230
19.3 Conclusion 231

Chapter 20 Wiener Index of Tensor Product of Cycle Graph and Some Other Graphs 233

H. S. Mehta and J. George
20.1 Introduction 233
20.2 Wiener Index of Tensor Product of Cycle Graph and Bipartite Graph 235
20.3 Wiener Index of Tensor Product of Cycle Graph with Some Non-bipartite Graphs 239

Chapter 21 Wiener Index of Some Zero-Divisor Graphs 247

S. K. Vaidya and M. R. Jadeja
21.1 Introduction 247
21.2 Wiener Index of the Zero-divisor Graph $\Gamma(\mathbb{Z}_n)$ 249
21.3 Wiener Index of Zero-Divisor Graphs from Direct Product of Rings 251
21.4 Concluding Remark 260

Chapter 22 Algebraic Signed Graphs: A Review 261

Pranjali and Amit Kumar
22.1 Algebraic Graph 262
22.1.1 Existing Algebraic Graphs 262
22.2 Signed Graph and its Parameters 264
22.2.1 Criteria for Balance 265
22.2.2 Criteria for Consistency 265
22.2.3 Criteria for Sign-compatibility 266
22.3 Algebraic Signed Graph 266
22.3.1 Existing Algebraic Signed Graphs 267
22.4 Signed Total Graphs 267
22.4.1 Balanced Signed Total Graphs 267
22.5 Signed Unit Graphs 269

Chapter 23 Nullity and Energy of Complete Tripartite Graphs 273

Pranjali and Renu Naresh
23.1 Introduction and Preliminaries 273
23.2 Nullity of Complete Tripartite Graphs 274
23.2.1 Techniques for Nullity of Graph 274
23.2.1.1 Zero-sum Weighting Technique 275
23.2.1.2 Co-neighbor Technique 275

23.3 Energy of Complete Tripartite Graphs 276
23.4 Conclusion 277

Chapter 24 Some New Results on Restrained Edge Domination Number of Graphs 279

S. K. Vaidya and P. D. Ajani
24.1 Introduction 279
24.2 Preliminaries 281
24.3 Characterization of Restrained Edge Dominating Set 281
24.4 Restrained Edge Domination Number of Star related Graphs 282
24.5 Restrained Edge Domination Number of Cycle related Graphs 284
24.6 Concluding Remarks 287

Chapter 25 Some New Graph Coloring Problems 289

Sudev Naduvath and Johan Kok
25.1 Introduction 289
25.2 Rainbow Neighbourhoods in Graphs 290
25.2.1 Rainbow Neighbourhood Number of Some Basic Graph Classes 291
25.2.2 Rainbow Neighbourhood Number of Graph Operations 295
25.2.3 Important Observations 296
25.2.4 Rainbow Neighbourhood Number of Some Cycle related Graphs 297
25.2.5 Rainbow Neighbourhood Number of Some Graph Transformations 299
25.2.6 Rainbow Neighbourhood Number of Graph Products 302
25.3 J-Coloring of Graphs 305
25.3.1 J-colorability of Graph Operations 308
25.3.2 The Paucity Number of Graphs 312
25.4 Conclusion 313

Chapter 26 Total Global Dominator Coloring of Graphs 315

K.P. Chithra and Mayamma Joseph
26.1 Introduction 315
26.2 Bounds for Total Global Dominator Chromatic Number 318
26.3 Total Global Dominator Chromatic Number for Some Classes of Graphs 322
26.4 Conclusion 326

Chapter 27 Rainbow Vertex Connection Number of a Class of Triangular Snake Graph 329

Dharamvirsinh Parmar and Bharat Suthar
27.1 Introduction 329
27.2 Rainbow Vertex Connection Number in Selected Graphs 330
27.3 Conclusions 338

Chapter 28 Hamiltonian Chromatic Number of Trees 339

Devsi Bantva and S. K. Vaidya
28.1 Introduction 339
28.2 Preliminaries 341
28.3 A Lower Bound for hc(T) 342
28.4 Theorem 1 vs. [3, Theorem 4] 346
28.4.1 Special Trees A_{2k} and A_{2k+1} 346
28.4.2 Broom Trees B_{2k} and B_{2k+1} 348
28.5 Concluding Remarks 351

Chapter 29 Some Results on Degree Sum Energy of a Graph 353

Mitesh J. Patel and G. V. Ghodasara
29.1 Introduction 353
29.2 Main Results 354
29.3 Conclusion 359

Chapter 30 Randić Energy of Some Graphs 361

S. K. Vaidya and G. K. Rathod
30.1 Introduction 361
30.2 Randić Energy of Extended m-Shadow Graph 363
30.3 Randić Energy of Extended m-Splitting Graph 365
30.4 Randić Energy of Double Cover of Graph 369
30.5 Randić Energy of Extended Double Cover of Graph 372
30.6 Concluding Remarks 379

Chapter 31 L-Spectra of Graphs Obtained by Duplicating Graphs Elements 381

S. K. Vaidya and K. M. Popat
31.1 Introduction 381
31.2 L-spectra of Graph Obtained by Duplicating Each Vertex by an Edge 382
31.3 L-spectra of Graph Obtained by Duplicating Each Edge by a Vertex 386
31.4 Conclusion 389

Index 391
