

MAOTOSAHI

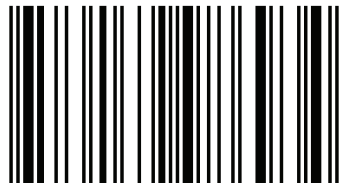

This book entitled "Mathematical Analysis of Transmission of Social and Health Issues" will help the readers to understand the applications of mathematics in various social and health issues like parking, modelling, liquor habits, smoking, etc. Also, the readers will come to know the applications of SEIR model, SEI model, SI model etc among different issues. Formulation of dynamical system among various issues can also be understood. This book will give a better understanding regarding Mathematical Modelling.

# Mathematical Analysis of Transmission of Social and Health Issues

Dr. Foram Thakkar received Doctor of Philosophy recently in Mathematics under the guidance of Prof. (Dr.) Nita H. Shah from Department of Mathematics, Gujarat University, Ahmedabad. I have worked in dynamical system of socio-medico problems. My research interest is applications of mathematics in various disciplines. Published 9 research articles.
