4.5. Research Design		64
4.6. Data Source		65
4.7. Sampling Plan		65
4.7.1. Sampling unit		65
4.7.2. Sample size		65
4.7.3. Sampling technique		66
4.8. Instrument		66
4.9. Measures		66
4.10. Pilot study		66
4.11. Reliability of scale		67
4.12. Timeframe		67
4.13. Data collection		67
4.14. Data analysis		68

4.14.1. Hypothesis and Test applied	68
4.14.2. Multiple Regression	69
4.14.3. Independent t-test	70
4.14.4. One way ANOVA	70
4.15. Conclusion	70
Chapter 5: Data Analysis	
5.1. Sample Composition	71
5.1.1. City wise data classification	73
5.1.2. Gender wise data classification	74
5.1.3. Age wise data classification	74
5.1.4. Marital Status wise data classification	75
5.1.5. No. of children wise data classification	75

5.2.12. Recreational activities	89
5.2.13. Family socialization at work	89
5.2.14. Subsidized consumer stores at work place	90
5.3. Data Analysis	91
5.4. Hypothesis Testing	91
5.4.1. Section 1 Analysis of Entire model	92
5.4.1.1. Sector wise analysis for the model	93
5.4.2. Section 2: Individual factors and TOI analysis	97
5.4.2.1. Hypotheses for employee Work life balance and Turnover Intentions	97

5.4.2.2. Hypothesis for Turnover Intentions and family related variables	102
5.4.2.3. Hypothesis for Turnover Intentions and work related variables	105
5.4.2.4. Hypothesis for Turnover Intentions and demographic variables	112
5.5. Conclusion	122

Chapter 6: Findings and Discussion

6.1. About the sample	123
6.2. Section wise detailed findings	123
6.2.1. Model Summary	123
6.2.2. Work Life Balance and Turnover Intention	123
6.2.3. Family Related Variables and TOI	124
6.2.4. Work Related Variables and TOI	124
6.2.5. Organization Sector and work life balance	125
6.3. Sector Wise Analysis	125
6.3.1. Organization Sector Wise Findings- complete model	125
6.3.2. Organization Sector Wise Findings WLB & TOI	125
6.3.3. Organization Sector Wise Findings for WLBI & TOI	126
6.4. Work Life Balance Initiative used	128
6.4.1. Preference of Use of available Work Life Balance Initiative	128
